Working around mobility

LiveServe: the new tool for the real state agent

With LiveServe you can offer a novel live virtual visit service using just a 3G mobile device.

Using LiveServe a real state agent can lively broadcast to the Internet everything captured by her mobile phone in the place she is. At the same time, a customer may be looking at the images and both can maintain a conventional phone conversation to agree on what exactly to see and how.

Solaiemes LiveServe puts it in your hands

Technology made easy

- ✓ The agent uses a 3G mobile device
- ✓ The customer opens a web browser
- ✓ The customer sees what the agent sees
- ✓ The agent listens the customer requests ...
 - Can you open that window?
 - May I see the kitchen again?
 - I love that armchair, could I keep it?

Advanced data control

- ✓ Marketing videos can be inserted in the live flow
- ✓ Scenes and conversations may be recorded
- ✓ Previously recorded scenes can be visualized
 - An agent can see all visits of a particular customer and analyze her preferences
 - Anyone can see prerecorded visits
 - A customer may have her own visit repository

Many application domains

- ✓ Real state agencies
- ✓ Independent professionals
- ✓ Contractors
- ✓ Insurance companies

Solaiemes is a mobility technology company strongly focused on creating innovative services and novel use cases for mobile devices and networks.
